Quality and relevance of assessment processes and tools used

The quality and relevance of the assessment processes and tools used are described below:

Internal Assessment Tests

Three Internal Assessment Tests are conducted in regular intervals during each semester. These are conducted to cover portions in stages from all the five units in each course of study to match all the Five COs. The question paper contains:

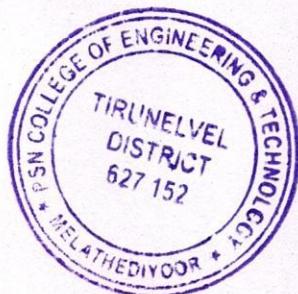

Short questions: Part-A - 10 marks ($2 \times 5 = 10$)

Descriptive questions: Part-B - 8 marks ($1 \times 8 = 8$)

Case Studies or Descriptive questions: Part-C - 32 marks ($2 \times 16 = 32$)

Total - 50 marks

The tests are conducted for duration of one hour and thirty minutes for each course. The question paper is set to measure the attainment level of the respective CO directly based on the performance of the Internal Assessment test. A sample serial test question paper is shown below.

Assignments

Assignments are being considered as one of the entity for the calculation of attainment of COs. Five assignments are given for a course to the students in a semester. The assignment questions are framed by the faculty handling the particular course.

End Semester Examination

End semester examination have an influence in the attainment of the specific CO with respect to the POs. End semester examination accounts for 70% weightage for the assessment of the COs. The examinations are conducted for 100 marks covering portions of all five units of the particular course. The marks are uniformly distributed over all the five units.

9. Attainment of Course Outcomes of all courses with respect to set attainment levels

Course Outcomes are mapped to Program Outcomes in order to measure the attainment levels. Attainment Levels of COs are based on the percentage of students getting more than the average marks in direct assessment methods, such as internal tests, Assignments, Project Reviews and End semester examination follows:

Attainment Level 1: If 50% to 59% of students score more than 50% marks.

Attainment Level 2: If 60% to 69% of students score more than the 50% marks.

Attainment Level 3: If $>=70\%$ of students score more than the 50% marks.

The total CO attainment is computed considering the performance of the students in the continuous internal evaluation and semester end evaluation, duly giving weightage to these two components.

Correlation levels 1, 2 or 3 as defined below:

1- Slight (Low)

2- Moderate (Medium)

3- Substantial (High)

Attainment is measured in terms of actual percentage of students getting set percentage of marks and the set percentage can be fixed by the faculty handling the course and it depends on the importance and nature of the course. If targets are achieved, then all the course outcomes are attained for that year. If targets are not achieved, an action plan is put in place to attain the targets in subsequent years.

10. Assessment tools and processes used for measuring the attainment of each of the Program Outcomes and Program Specific Outcomes

Attainments of Program Outcomes (POs) and Program Specific Outcomes (PSOs) have been validated through direct (Serial tests, Class tests, Assignments and End semester examination) and indirect measurement tools (Student Exit Surveys, Course End Surveys, Alumni and Employer feedbacks)

1. Direct Assessment Tools

The undergraduate program of Electrical and Electronics Engineering is a credit based continuous evaluation system. Evaluation is accomplished by the course faculty throughout the semester and the End semester examination conducted. The direct assessment for the attainment of POS and PSOs contribute 80%

Internal Test I

This test is conducted within 4-5 weeks after the commencement of the semester. The syllabus of the internal test includes 30-35% of the total course content.

Internal Test II

This test is conducted at the mid of the semester. The syllabus for the test is the next 30%-35% of the total course content.

Internal Test III

This test is conducted at the end of the semester. The syllabus is the remaining 30% -40% of the total course content.

Assignments

Five assignments are prepared for all the subjects to evaluate the attainment of POs and PSOs.

End semester examination

This is conducted at the end of each semester.

Practical Courses

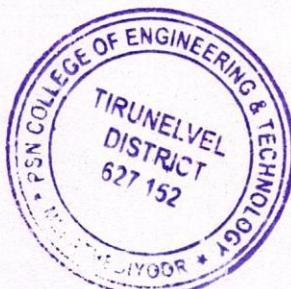

Continuous monitoring of POs and PSOs is evaluated through student performance in the laboratory classes, viva-voce and Seminars.

Indirect Assessment Tools

PO attainment is obtained by taking Course End Surveys, Instructor Evaluation Reports and Parent's Feedback Reports which are listed in Table

Indirect Assessment Methods

S.No.	Tools	Frequency of assessment
1	Course End Survey	01/Course/Semester
2	Instructor Evaluation Report	01/Course/Semester

11. Quality/relevance of assessment tools / Process used

The following procedure is adopted to validate the Program Outcomes (POs) and Program Specific Outcomes (PSOs):

Initially, Course Outcomes (COs) have been framed with the help of course objectives. POs and PSOs have been matched with the COs as per the contents available in POs, PSOs and COs. Attainment of POs and PSOs is measured with the help of direct and indirect assessment tools as stated. For direct attainment, 70% weightage is given for the End semester examination and 30% weightage is given for the Serial test performance and Assignments. The cumulative PO/PSO attainment is calculated by considering 80% weightage for direct attainment and 20% weightage for indirect attainment as below:

Method of Assessment	Direct Attainment	Indirect Attainment		
		Course End Surveys	Instructor Evaluation Report	Parent's Feedback Reports
% weightage	80%	20%
